Applicant's election of Group I, claims 1-11, in the reply filed on May 4, 2007 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 and its dependent claims are indefinite as to the multiple use of "optionally" and "optional" as it is not clear what components are necessary for the claimed invention.

Claims 3 and 4 are indefinite as to the use of "preferably" as it is not clear which temperatures and times Applicant intends to claim.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 1761

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-11 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Silver et al (US 6372268).

Silver et al (US 6372268) teach a wheyless process for the production of mozzarella cheese comprising mixing water, dairy fat, and dried milk with a lactic acid producing bacteria, mechanically working and heating at a temperature of about 150 to about 175°F to form mozzarella cheese, wherein the process does not include the formation of whey (see entire patent, especially claims 1-4).

The claims differ as to the specific recitation of liquid milk.

Silver et al teach the combination of water and dried milk which inherently and/or obviously is the same as liquid milk (see claim 1).

Han (US 6406736) and Cha et al (US 6913774) are cited as of interest to the claimed invention.
